This is UNEVALUATED Information

- 25X1
1. At about 0950 on 6 May and at about 0930 on 6 June 1955, no air activity was observed at Schoenwalde airfield. On 6 May, 1 Po-2 and 2 IL-10s were parked in the northwestern corner of the field and on 6 June only 1 Po-2 was seen in that area.
 2. No changes were seen on the antenna installation at the drill grounds, which consisted of 4 wooden masts each about 18 meters high, 1 small wooden hut, and 1 concrete shelter. No soldiers were observed there, no radar sets were seen on the drill grounds. A model SCR-584 set was still observed at the roof of the building north of the drill ground. It was not observed that this set rotated.
 3. Personnel wearing black-bordered blue epaulets were still observed at the quartering billets during the period of observation. Lieutenant Colonel Chesnakov's request for a separate accounting for the air force unit in these quarters had apparently been rejected by Colonel Tyulenev.
Current consumption at the field was broken down as previously:
90 % of Unit Colonel Tyulenev
10 % of Unit Lieutenant Colonel Chesnakov.

 Comment. Occupation, radio, and radar installations at Schoenwalde airfield remained unchanged. The two IL-10s, which were observed at the field on 6 May, had probably made intermediate landings there.
